GALLERY LIGHTING

The Hospital Club's Gallery is a truly unique space and thanks to our newly-installed RGB/LED lighting system, there are now more options than ever before when it comes to creating bespoke lighting effects and styling the space specifically for your event.

From standing receptions, press launches and conferences through to fashion shows, product launches and exhibitions, the Gallery combines elegance with a unique opportunity to create and design an unforgettable experience for you and your guests.

The Gallery is also a multipurpose exhibition space which can accommodate a range of work from spot lit two dimensional wall mounted pieces to free standing, three dimensional forms which allows an even and neutral spread of light as well as giving capabilities for more precise and controlled solutions.

ABOUT THE SYSTEM:

- In partnership with White Light and Phillips we are proud to offer a state-of-the-art immersive RGB/LED system
- A Gallery lighting system that allows you to transform the space by creating event specific moods for special projects and exhibitions
- Work with our in-house lighting designer and our intelligent LED profiles to customise colour temperature and intensity to fit any brand or theme
- Create bespoke and customised GOBOs and spotlighting throughout the space
- The RGB/LED Wall Wash Units and Spotlights provide endless possibilities for theming and mood lighting, but also include pre-programmed options where preferred
